DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4, 6, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is vague and indefinite since it depends from cancelled claim 2, and claims 6 and 8 depend in turn from claim 4.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, 4 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hursh.

See especially Figures 1, 4, and 5. Note that the trailing wall of the indentation is longer than the front wall since the front has rounded corners.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hursh in view of Cabeza.

Hursh discloses an aviation tire comprising all claimed elements, including a circumferential row of indents which provide increased wind resistance when at the

bottom of the rotating tire. Hursh fails to show having plural circumferential rows or having smaller indents in outward rows. Cabeza teaches, see Figure 1, that it is known to have a plurality of circumferential rows of wind resistant elements on an aviation tire. Motivation to combine is the increased performance available from a greater number of wind resistant elements. To employ the teachings of Cabeza on the tires of Hursh and have a plurality of circumferential rows of indents is considered to have been obvious to one having ordinary skill in the art. Likewise, to merely vary the size of the indents from one row to another is not believed to provide any unexpected or patentable results. It would be a matter of normal engineering skill and practice to vary the size of the indents in order to provide the desired level of performance for a particular situation.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

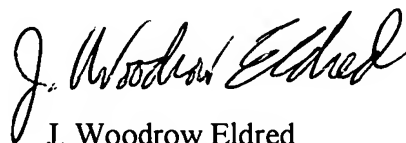

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
